Dear Doug

I would like to formally thank you for your involvement in our recent project of acquiring five Connect-A-Dock 1000 Series rowing pontoons. As you will be aware, we along with many of our clubs were quite seriously affected by the deliberate lowering of Lake Burley Griffin in early December 2011. We at that stage had begun a process of acquiring a rowing launch pontoon for our regatta venue. It was at this time you approached us with your alternative, the Connect-A-Dock product. We very quickly became aware the Connect-A-Dock was going to be a great solution. Your pontoons represented great value for money, in fact we were able to nearly double our square metre coverage when compared to one of your competitors. In addition the lightweight and adaptable versatility of the Connect-A-Dock pontoons will allow us to utilise the pontoons in a wide range of locations and configurations for years to come.

I would also like to particularly thank you for your involvement in the shipping process. We found your assistance coordinating with the manufacturer, flight and handling companies and ourselves invaluable. The product was delivered as described and has proved to be a great choice. I have no doubt our pontoons will prove to be a success for years to come. I have no hesitation in recommending the Connect-A-Dock product along with your services to anyone searching for such a product.

Once again on behalf of Rowing ACT along with many rowers within the ACT please accept my thanks.

Sincerely

A handwritten signature in black ink, appearing to read "James Hammond", is written over a decorative background of overlapping curved bands in light blue, yellow, and light green.
