

Enhance Your Rowing Club Finances with Dragon Boating

In today's economy, rowing club managers are looking for ways to make money and keep their clubs afloat. Space Saver Rowing Systems has a simple solution, and it breathes fire.

Dragon Boats.

Dragon boats are propelled by 22 members. With each crew, you can add an **additional 20+ members** to your club – a lot faster than the same number of rowers or scullers.

In as little as one year, dragon boating **will pay for itself** and its mechanical boat storage. All you need is space in your boathouse, storage and a recruitment drive.

Got a dragon boat or thinking about one? Then protect your equipment investment and your crew's safety with the **Mechanical Dragon Boat Stacker**.

Easy To Use

- Requires only a few people to load or unload boats
- Simple button-activated arm

Safe

- Lowers the risk of back injury
- Protects boats from dropping from a high rack

Saves Time

- Takes only half the time to store and unload boats
- Get on and off the water faster

For more information about the Mechanical Dragon Boat Stacker, please visit:

www.ssrs.net.au/DragonBoatStacker

“Previously, we had to store our boats on trailers or trolleys and this required a lot of space. Having the Mechanical Dragon Boat Stacker now means we can store our boats safely and neatly without the added worry of our crew injuring themselves lifting the heavy boats.”

– Julie Elliot

Secretary of the Queensland Dragon Boat Club, who recently installed a mechanical dragon boat stacker.
